

Assembly Instructions

SeaAira Adirondack Swing

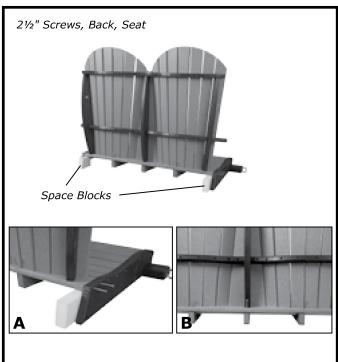

Tools Needed: hammer, 7/16" wrench, #2 square bit screw driver or power driver, punch No drilling is required. All the necessary holes are predrilled. Bolts fit snugly in the holes. You may need to use a hammer to drive the bolts through the holes.

Parts

Step 1 — Fasten Seat to Back

- **A.** Place the two space blocks close to the side rails of the seat assembly where the back attaches. Set the back on top of the spacer blocks. Keep the spacing between the seat slat the same as the other slats. Fasten with four $2\frac{1}{2}$ " screws using the pilot holes in the seat side rail.
- **B.** Using the pilot holes place three 2½" screws in the bottom of the back assembly to secure it to the seat.

Step 2 — Fasten Arms to Seat

31/2" Bolts, 23/4" Bolts, 13/4" Screws, Arm Assemblies

- **A.** Push carriage bolts through the holes in the arm assembly. Use $3\frac{1}{2}$ " bolts for the front and $2\frac{3}{4}$ " bolts for the back. Tap the bolt heads with a hammer to set them firmly against the leg. Place the nuts on the bolts and tighten securely.
- ${\bf B.}$ Place three 134" screws in the pilot holes of the back crosspiece to secure it to the back of the arm.
- ${\bf C}_{f \cdot}$ Using a 1 3 4" screw, fasten the brace to the seat assembly.

Step 3 — Fasten the Chain

2 Sets of Chain

Fasten the shortest length of chain to the eye bolt in the back. Fasten the second longest chain to the eye bolt in the seat.

Congratulations! Your SeaAira Adirondack swing is ready to enjoy!
